ABOUT ME

Ambitious and enthusiastic **full-stack developer** with a strong foundation in **web development** technologies. Proficient in **front-end** and **back-end development**, with expertise in designing and managing **databases**. Passionate about building scalable and efficient applications. Eager to apply my skills and knowledge to contribute to innovative projects and grow as a developer.

SUMMARY

- Proficient in relational database concepts with strong knowledge of SQL, including **Tables, Views, Synonyms, Sequences,** and **Indexes**.
- Experienced in writing and executing DDL, DML, TCL, and DCL statements using tools such as iSQL*Plus and MySQL.
- Familiar with PL/SQL fundamentals, including block structures, conditional logic, and basic procedural programming.
- Proficient in using CSS frameworks like **Bootstrap** to build **responsive** and visually appealing user interfaces.
- Skilled in developing React applications, with experience in creating scalable folder structures and implementing reusable components.
- Excellent Presentation, interpersonal skills with a strong desire to achieve specified goals.

EXPERIENCE

- ➢ 3 Months working in Pothys Traditional (Managing online inventory, orders and uploading their products on Shopify and Unicommerce Platform).
- ➢ Currently working under LKS Gold house Tambaram

EDUCATION

B.COM (CA) from Theni, P.S Muthu College of Arts and Science

(Madurai Kamaraj University) with 59% (2024).

CERTIFICATES

- Completed ORACEL at INFYCLE TECHNOLOGIES – MAY 2025.
- Completed FULLSTACK At INFYCLE TECHNOLOGIES – MAY 2025.

TECHNICAL SKILLS

- Operating System **:** Linux, Windows7-10, Mac OS.
- Web Technologies **:** HTML5, CSS, JavaScript, React
- Application Server **:** Node JS, Express JS
- Development Environments **:** Visual Studio.

PROJECT HISTORY

1. PROTFOLIO

URL	**:**	https://github.com/ijazathayi/portfolio.git
Role	**:**	Full-Stack Developer
Environment	**:**	HTML, CSS, JavaScript, React, Oracle DB, Node, Express

Description:

Portfolio with a collection of projects and work that demonstrate my skills in web development, database technologies, and front-end design. Here, you'll find examples of my ability to build responsive applications, write efficient code, and solve complex technical challenges.

Responsibilities:

- Development of UI and web service integration.

- Front end development.

- Making the websites Responsive.

- Checking the websites in all browsers for browser compatibility.

2. TO-DO LIST

URL	**:**	https://github.com/ijazathayi/Todo-list.git
Role	**:**	FullStack Developer
Environment	**:**	HTML, CSS, , React, Node, Express, Mongo-DB

Description:

Developed a full-stack **To-Do List** web application featuring user authentication and task management. Integrated MongoDB for persistent data storage, enabling users to securely create, update, and delete tasks across sessions. Implemented user management for personalized task lists and ensured smooth front-end and back-end communication.

Responsibilities:

- Designed and developed a full-stack To-Do List web application with user authentication and personalized task management features.
- Storing tasks in mongodb.
- Created RESTful APIs for seamless communication between front-end and back-end components.

3. SMALL TOOLS

URL   : https://github.com/ijazathayi/Small-application.git
Role   : FullStack Developer
Environment   : HTML, CSS, React, Node, Express, Mongo-DB

Description:

Built a set of lightweight, interactive web-based tools including a **Camera Access Tool**, **QR Code Scanner & Generator**, and a **Basic Calculator etc..**. These tools showcase functionality with real-time input/output handling, DOM manipulation, and device hardware access using modern JavaScript APIs.

Responsibilities:

- Developed modular, browser-based tools using HTML, CSS, and JavaScript for everyday utilities like camera access, QR scanning/generation, and calculations..
- Focused on responsive UI design to ensure compatibility across mobile and desktop devices.
- Ensured each tool had a clean, intuitive interface and performed efficiently with minimal dependencies.

4. STREAM TUNES

URL   : https://github.com/ijazathayi/StreamTunes.git
Role   : Full-Stack Developer (Currently working on it)
Environment   : HTML, CSS, React, Node, Express

Description:

Developed **StreamTunes**, a Spotify-like web application leveraging the Spotify Web API to enable music search, playback, and playlist exploration, built with React and modern web technologies.

Responsibilities:

- Front end development and Back-end development.
- Implemented to play a music with spotify web API.
- Making the app responsive in all screens for both website and mobile.

Declaration:

I hereby declare that the information mentioned above is true to the best my knowledge.
